

Roller Mixer

The Roller Mixer is used for mixing and blending of the blood, powder reagents, total blood control materials in anticoagulation tubes or bottles. It is proven to be more accurate and effective than manual mixing. To fulfil the different requirements in laboratories, it can be used for rolling mixing, anticlockwise rolling and features adjustable speed. It is an ideal instrument for the clinical Lab.

Specifications:

Speed:	10-80rpm
Vibrating Range:	22mm \pm 1mm
Power consumption:	12W
Voltage:	AC220V \pm 10% (50/60Hz)
Weight:	3,6 kg
